

At Chichester Nursery School ...

We forge genuine partnerships with our parents and carers so that children settle well into Nursery and, through sensitive nurturing, ensure that children feel happy, safe and secure during their time with us.

Through constant reflection and discussion, staff create a dynamic, exciting environment where children are able to engage in meaningful learning experiences and have the opportunity to develop key life skills such as self-motivation, independence, resilience and the ability to build relationships with others.

By getting to know children as individuals, staff give them time to explore and discover their own interests, inspiring them to become confident, creative and fascinated learners.

We value the importance of children's home experiences and work closely with parents to ensure that children are as prepared as possible for their future education and journey through life.
